

Assignment

Executive Summary Snapshot:-

- As a environmentally conscious companies, trying to make positive difference in a world, there lack of contact betⁿ doctor and patient, weak communication, not get an appointment of time, next appointment information etc. we are facing these problem.
- The doctor can not get much time for particular patient and treat them, sometime appointment is miss & sometime our appointment get cancelled.
- After doctor's appointment patient or patient relative want to run for medicines for medical store.

Project Descriptions:-

- To get out from such situation day by day we want to execute the website or public app. which can get more easier for doctor's and patient communication.
- We want to make an interactive dashboard with informative notes. The app/website should be public where all particular cities doctor can joined by getting access on app. Used as a bussiness ideas. The patient can get online appointment on particular hospital at home just by one message.

Scope -> It will be benefical for patient & doctors for appointment online medicine list & alert on next appointment.
